## Resume

Computer Science student working as a Software Developer. I have experience with distributed systems, microservices, Ibm MQ, Pub/Sub Kafka, container platforms using kubernetes like openshift. Still, I have experience with AWS services and solutions. Iac like terraform, Devops and Ci/Cd using github and github actions. I really like learning new things and working with different areas. I'm always willing to teach and face new challenges.

## Experience

### Itaú Unibanco, Brazil — Junior Software Developer

August 2021 - Current

Migrated microservices from PaaS on Openshift to AWS Cloud in an Event-driven architecture. Collaborated with development team members to create and integrate high availability solutions for mission-critical banking applications.

### Itaú Unibanco, Brazil — Software Developer Intern

March 2020 - August 2021

Generated efficient, modular and maintainable back-end code. Designed and implemented backend models and API endpoints for complex workflows.

### Kuka Systems, Brazil — Software Developer Intern

May 2019 - January 2020

Maintenance and support of a monolithic system. Backup and updates of the financial and human resources system to generate data for the company's management and direction.
